PROFILE

B.Com (Honours) in Strategic Finance student pursuing internship opportunities in **Equity Research, Investment Banking, and Corporate Finance**. Built an integrated three-statement DCF valuation model and a DuPont-based financial statement analysis, translating raw financials into actionable investment recommendations. Proficient in Excel-based financial modeling, ratio analysis, and portfolio benchmarking against the NIFTY 50 — most recently applied through Meredian, a self-built equity research platform.

EDUCATION

Jain Deemed-to-be University, Bengaluru

2025 – Present

Bachelor of Commerce (Honours), Strategic Finance | Cumulative GPA: 7.4

Relevant Coursework: Corporate Finance, Financial Accounting, Business Economics, Investment Analysis

PROJECTS

Meredian – AI-Assisted Equity Research Platform

GitHub: [\[add link\]](#) | Live Demo: [\[add link\]](#)

- Designed and built a web-based equity analysis platform delivering company research, valuation insights, and financial data visualization for retail investors
- Owned end-to-end product direction — architecture, feature design, UI/UX workflow, testing, and deployment — using AI-assisted development tools to accelerate build velocity while directing every design and product decision

Equity Valuation – Infosys Ltd. (Three-Statement DCF Model)

- Built an integrated three-statement financial model (Income Statement, Balance Sheet, Cash Flow Statement) for Infosys (NSE), dynamically linking statements to drive an assumption-based DCF valuation
- Modeled scenario and sensitivity analysis across 6–10% revenue growth, 10% WACC, and 4% terminal growth assumptions, estimating intrinsic value of ₹1,319 (vs. ₹1,297 market price, ~1.7% variance) with a fair value range of ₹1,200–₹1,500

Financial Statement Analysis – Wipro Ltd.

- Analyzed FY21–FY23 financials via DuPont decomposition, identifying 29% ROE driven by an 18% net margin and conservative 0.09x D/E leverage (current ratio: 2.4x)
- Benchmarked ratios against IT sector averages; synthesized findings into a structured investment memo with a Hold recommendation supported by margin-trend and balance-sheet analysis

AI-Powered Internship Outreach Automation

- Designed and deployed an AI-assisted outreach automation workflow, generating personalized recruiter emails via the Gemini API and using GitHub Actions to schedule and run outreach campaigns automatically
- Integrated recruiter and company datasets into the automation pipeline and engineered prompts to personalize outreach at scale, reducing time spent on repetitive manual email drafting
- Owned the end-to-end workflow — automation logic, prompt design, data integration, testing, and deployment — applying a process-optimization lens to a real internship-search bottleneck

Portfolio Analytics Dashboard – Excel

- Built a dynamic Excel dashboard tracking a 15-stock simulated equity portfolio's returns, sector allocation, and position sizing over 6 months
- Benchmarked 12.4% portfolio CAGR against the NIFTY 50's 10.2%, attributing outperformance to sector- and stock-level allocation decisions

SKILLS

Financial: Financial Modeling, Three-Statement Modeling, DCF Valuation, Scenario & Sensitivity Analysis, Financial Statement Analysis, Ratio Analysis, Equity Research, Investment Analysis, Forecasting, Risk Assessment

Technical: Microsoft Excel (Sensitivity Analysis, Data Visualization), AI Automation, Workflow Automation, Prompt Engineering, GitHub Actions, Data Integration, GitHub

EXTRACURRICULARS / POSITIONS OF RESPONSIBILITY

Business Development Team, SAMARTHYA 2026 – Placement & Internship Forum (SCAPS), Jain University 2025 – Present

Sourced and cold-outreached finance companies for Jain's first-ever intra-college internship fair (60 companies, ~1,000 attendees over 2 days); managed on-spot registration and floor coordination throughout the event

2nd Runner-Up – Jain University Entrepreneurship Week — recognized for entrepreneurial pitching and business strategy at the annual university-wide competition
