## PROFILE

I am a B.Com (Honours) in Strategic Finance student pursuing internship opportunities in **Equity Research, Investment Banking, and Corporate Finance**. Built an integrated three-statement DCF valuation model and a DuPont-based financial statement analysis, translating raw financials into actionable investment recommendations. Proficient in Excel-based financial modelling, ratio analysis, and portfolio benchmarking against the NIFTY 50 — most recently applied through Meredian, a self-built equity research platform.

## EDUCATION

**Jain Deemed-to-be University, Bengaluru**

2025 – Present

Bachelor of Commerce (Honours), Strategic Finance | Cumulative GPA: 7.4

Relevant Coursework: Corporate Finance, Financial Accounting, Business Economics, Investment Analysis

## PROJECTS

### Meredian – AI-Assisted Equity Research Platform

Live Demo: <https://meredian-equityanalyzer.lovable.app>

- Designed and built a web-based equity analysis platform delivering company research, valuation insights, financial data visualization, DCF and comparable valuation, scenario and sensitivity analysis, annual-report analysis, report exports, and an AI research assistant
- Owned end-to-end product direction — architecture, feature design, UI/UX workflow, finance logic, testing, and deployment — using AI-assisted development tools while directing the product and validating research outputs against company disclosures
- Tested the valuation and research workflows against annual-report information and iterated on the product to improve consistency, usability, and the quality of generated research outputs

### Equity Valuation – Infosys Ltd. (Three-Statement DCF Model)

- Built an integrated three-statement financial model for Infosys, dynamically linking the Income Statement, Balance Sheet, and Cash Flow Statement to drive an assumption-based DCF valuation and FY2025E–FY2029E projections
- Modelled scenario and sensitivity analysis across 6–10% revenue growth, 10% WACC, and 4% terminal growth assumptions, estimating intrinsic value of ₹1,319 versus ₹1,297 market price with a fair-value range of ₹1,200–₹1,500
- Extended the workbook into FY2025E–FY2029E balance-sheet projections with linked liquidity, profitability, leverage, and efficiency ratios so forecast assumptions flowed through the model dynamically

### Financial Statement Analysis – Wipro Ltd.

- Analysed FY22–FY24 financials through profitability, liquidity, leverage, efficiency, trend, and DuPont analysis, tracking ROE from 18.7% to 14.9%, operating margin from 17.7% to 15.2%, and debt-to-equity from 0.23x to 0.19x
- Evaluated liquidity and efficiency trends, including current ratio improving from 1.04x to 2.60x and average collection period falling from 53.2 to 48.5 days
- Benchmarked Wipro against Infosys, TCS, and HCLTech and synthesised the findings into an investment memo with a Hold recommendation, highlighting strong liquidity and balance-sheet stability alongside weakening operating performance

### Indian Equity Portfolio Analytics Dashboard

- Built a formula-driven Excel dashboard for a 15-stock Indian equity portfolio with holdings, monthly price tracking, invested value, current value, portfolio weights, stock-level returns, P&L, and sector allocation
- Benchmarked portfolio and stock performance against a 6.2% NIFTY 50 six-month return, calculating annualised returns and alpha while visualising portfolio trends, allocation, and top alpha generators
- Built a formula-reference structure covering invested amount, current value, portfolio weight, P&L, portfolio return, annualised return, alpha, benchmark comparison, and stock-rating logic to keep the dashboard auditable

### Behavioural Biases Influencing Investment Decisions Among Young Indian Investors

- Developed a longitudinal behavioural-finance study examining overconfidence, herding, loss aversion, anchoring, and confirmation bias, supported by a literature review focused on Indian investor behaviour and digital investing
- Conducted the first fieldwork phase using 18 semi-structured interviews across young retail investors, finance students/intermediate investors, and financial advisers/investment professionals, then used thematic analysis to compare how bias expression changes with experience
- Identified a progression from social-media-driven herding and purchase-price anchoring among newer investors toward model overconfidence and valuation anchoring among more experienced participants, while professionals still showed residual self-attribution gaps

## ADDITIONAL PROJECTS

---

### Bond Valuation & Fixed-Income Risk Analysis – Monaco

- Analysed Monaco's Euro-linked fixed-income market, bond pricing and yield spreads, Eurozone yield-curve signals, duration, convexity, credit risk, and securitised instruments including RMBS, ABS, and covered bonds
- Compared interest-rate sensitivity across German Bunds, French OATs, and corporate Eurobonds and connected yield-curve positioning, duration, convexity, and credit quality to portfolio risk management

### Derivatives in the Real World – Corporate Risk Management

- Built real-world cases across currency futures, interest-rate swaps, gold futures/options, credit default swaps, and stock-option strategies, including TCS foreign-exchange exposure and Reliance Industries interest-rate risk with numerical hedge scenarios
- Modelled hedge payoffs to show how derivatives can stabilise foreign-currency receipts and floating-rate borrowing costs while introducing counterparty, basis, liquidity, and opportunity risks

### Karvy Stock Broking Scandal – CFA Ethics Analysis

- Analysed SEBI findings on misuse of client securities and mapped the case to CFA Standards III(A), I(A), I(D), IV(C), and VI(A), covering fiduciary duty, custody controls, conflicts of interest, supervision, and market-conduct consequences
- Reconstructed the client-securities-to-borrowing chain and evaluated how repeated pledging, related-party funding, and weak asset-segregation controls turned a fiduciary breach into a broader governance and supervision failure

### Business Analytics at HDFC Bank

- Mapped descriptive, diagnostic, predictive, and prescriptive analytics across customer personalisation, credit/risk scoring, lead prioritisation, digital journeys, straight-through processing, GenAI document extraction, and fraud/anomaly monitoring
- Connected analytics use cases to business value through faster processing, more relevant customer journeys, stronger risk control, and scalable servicing without inventing unsupported ROI figures

### The 2008 Global Financial Crisis – Origins, Transmission & India's Response

- Studied subprime lending, securitisation, systemic contagion, liquidity stress, FII outflows, rupee pressure, and India's policy response through RBI liquidity measures, CRR/repo cuts, and fiscal stimulus

### Economic Impact of the 2023 Israel–Hamas War

- Assessed the conflict's effects on Israel, India, and global markets through GDP, labour, trade, fiscal pressure, oil and commodity volatility, shipping and insurance costs, supply-chain risk, and investor sentiment

### SDGs 8, 9 & 11 Through a Finance Lens

- Analysed decent work and growth, industry and innovation, and sustainable cities through productivity, financial inclusion, infrastructure, municipal bonds, PPP models, green financing, smart-city investment, and long-term capital formation

### Bridging Digital Education Inequality in India

- Scoped the rural–urban digital education gap through technology, economics, and sociology/education lenses, mapping stakeholders, root causes, existing solutions, and SDG alignment to frame an accessible low-bandwidth problem statement

## SKILLS

---

**Financial:** Financial Modelling, Three-Statement Modelling, DCF Valuation, Scenario & Sensitivity Analysis, Financial Statement Analysis, Ratio Analysis, Equity Research, Investment Analysis, Forecasting, Risk Assessment

**Technical:** Microsoft Excel (Sensitivity Analysis, Data Visualization), Basic Python

## EXTRACURRICULARS / POSITIONS OF RESPONSIBILITY

---

### Business Development Team, SAMARTHYA 2026 – Placement & Internship Forum (SCAPS), Jain University

2025 – Present

- Sourced and cold-outreached finance companies for Jain's first-ever intra-college internship fair — 60 companies, ~1,000 student attendees across 2 days
- Managed on-spot registration and floor coordination throughout the event

**2nd Runner-Up – Jain University Entrepreneurship Week:** Recognized for entrepreneurial pitching and business strategy at the annual university-wide competition
